

Beginners guide to earning BTCT online

For Android Mobile, to follow step by step:

Step 1:

Download and install the Altily Exchange app through Google Play.

Open the app and choose 'Register New Account'.

If you like, please be so kind to use my Referral code:

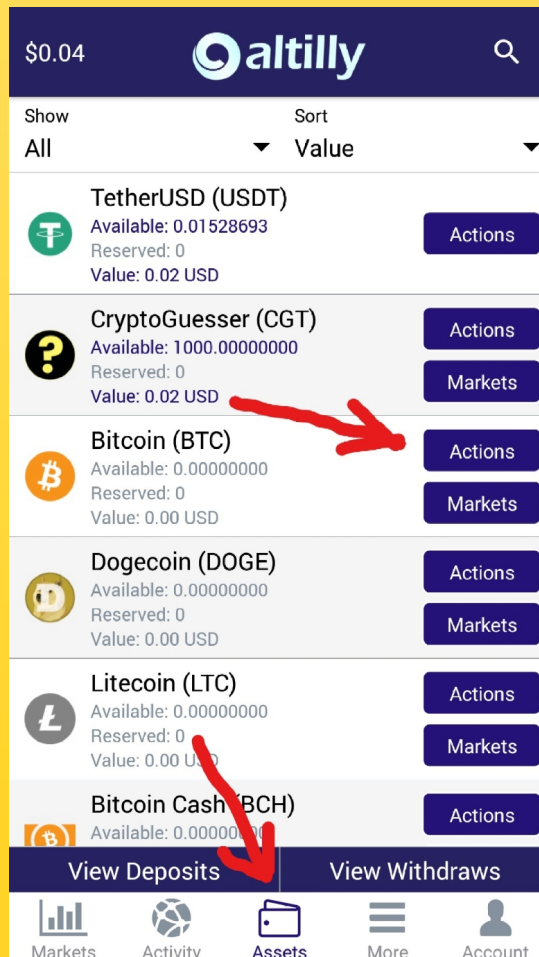

10010a

or use the QR code

Step 2:

Deposit BTC to your Altily account. You can find the deposit address under 'Assets > Actions > Deposit BTC'

It's also possible to use other exchange apps like CREX24 exchange app. I don't know it, so in this guide use only Altilly as an example.

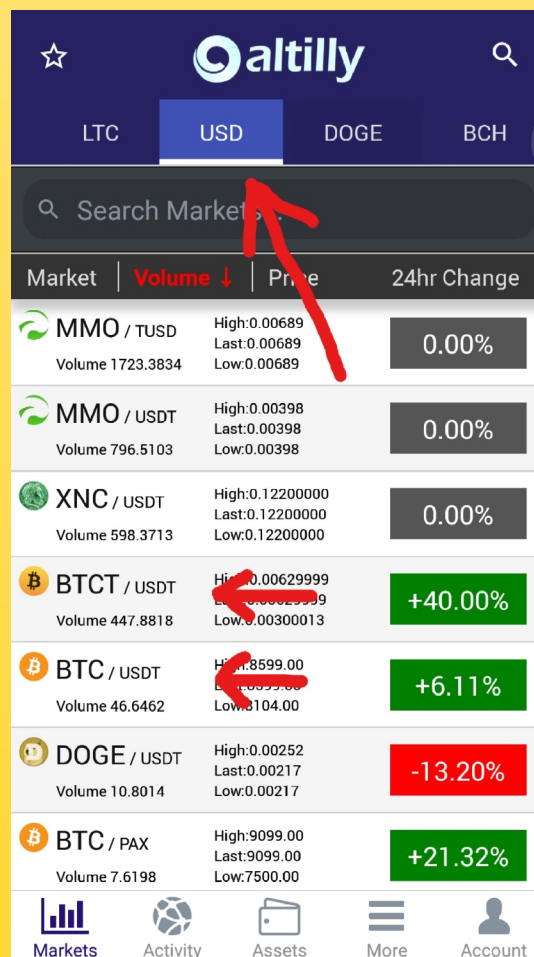

Step 3:

In this step you are free to choose with asset you will use to trade.

For this example, I use **USDT (Tether)**, because it is a stable market and both the trading pairs **BTC/USDT** and **USDT/BTCT** exist. But you can also choose to trade your **BTC** for **DOGE** or anything else that is a trading pair with **BTCT**.

Remember, the endgoal is to buy **BTCT**. So whichever market is more favorable or you prefer to use, you can use.

Only the direct trading from **BTC** to **BTCT** is not possible, since **BTC/BTCT** is not an existing trading pair.

| Market | Volume ↓ | Price | 24hr Change |
|-------------|------------------|--|-------------|
| MMO / TUSD | Volume 1723.3834 | High:0.00689 Last:0.00689 Low:0.00689 | 0.00% |
| MMO / USDT | Volume 796.5103 | High:0.00398 Last:0.00398 Low:0.00398 | 0.00% |
| XNC / USDT | Volume 598.3713 | High:0.12200000 Last:0.12200000 Low:0.12200000 | 0.00% |
| BTCT / USDT | Volume 447.8818 | High:0.00629999 Last:0.00629999 Low:0.00300013 | +40.00% |
| BTC / USDT | Volume 46.6462 | High:0.08599.00 Last:0.08599.00 Low:0.08104.00 | +6.11% |
| DOGE / USDT | Volume 10.8014 | High:0.00252 Last:0.00217 Low:0.00217 | -13.20% |
| BTC / PAX | Volume 7.6198 | High:9099.00 Last:9099.00 Low:7500.00 | +21.32% |

**I will not explain the trading; this is your own responsibility and has to stay like that. Just make sure you get to know the system well before trading.*

Click on the 'USD' market. Under it, you find both **BTC/USDT** market as the **BTCT/BTC** market. Now trade your **BTC** to **USDT**.

When you have done this, trade your **USDT** for **BTCT**.

Remember, you can always go back to the header 'Assets' to see what your balances are and thus what you have traded.

Congratulations!
You are now one of the proud holders of BTCT!
Welcome to the community.

Step 4:

Now this is the most interesting step – how to make *more* of your investment, without working for it!

Go to:
[Crypos.io](https://crypos.io)

When you scroll down, you will find BTCT.
Click on it, scroll down further and click on 'Share masternode'.

Now, it will go to the login page. Look down where you see
'Don't have an account' and click 'Create'.

After creating an account, you will see the same screen again.
Scroll down to look for BTCT and click 'Share masternode' again.
It will show you a BTCT address.
Click on the copy sign next to it to copy the address.

**As you can see, there is a slider under 'reinvest'. Here you can choose to put a percentage of your rewards back into the shared masternode, to earn even more.
If you put this slider to a 100%, all your earnings will be sent to the same Crypos wallet, to be reinvested.*

Now, open your Altilly app again.
Go to your 'Assets', find your BTCT wallet, click 'actions'
and this time, click 'Withdraw'.
Paste the address you copied onto the Altilly address line. Above it, put the
amount you want to invest in the shared node and click 'Withdraw'.

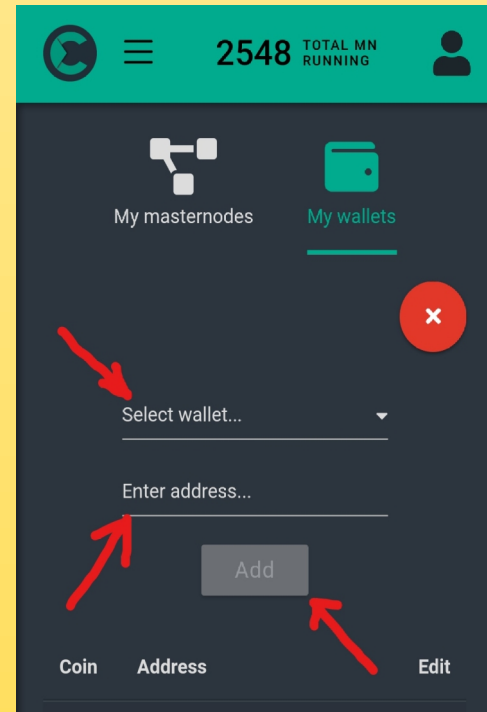

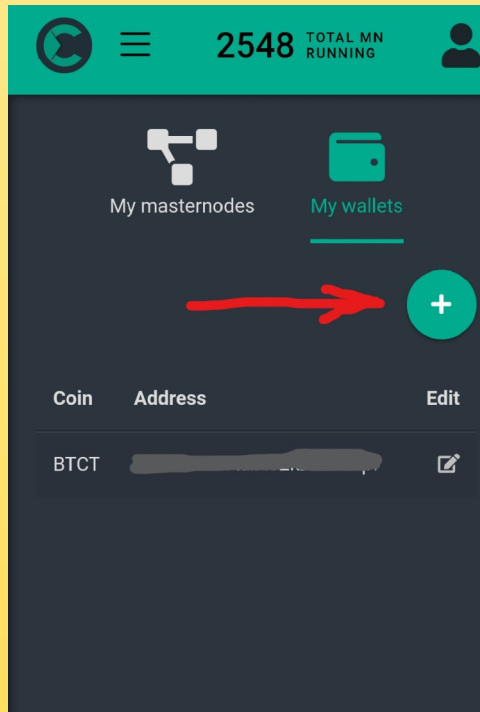

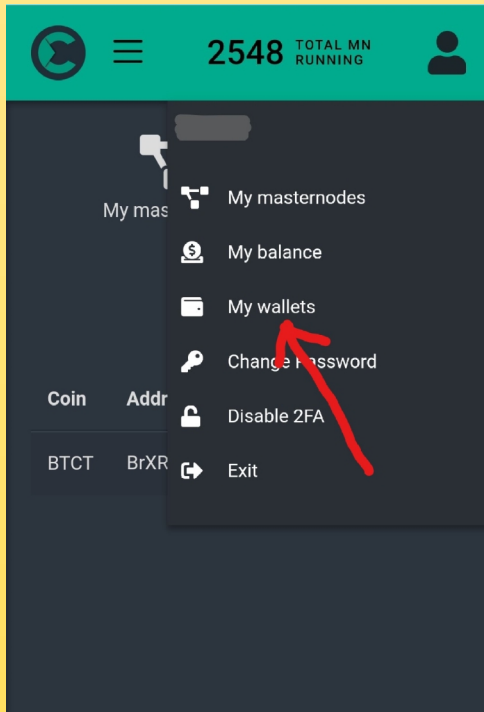

As soon as your withdrawal is confirmed, your shared masternode is going
start working. Congratulations, you are now generating new BTCT!
To receive this BTCT, follow the next step:

Step 5:

To receive your earned BTCT to your online Altilly wallet, you have to put
your receiving wallet address into your account at Crypos.io.
Look at the left picture above on this page. Here you see the Altilly app with
a red arrow to the 'Withdraw BTCT'.
Now, instead of 'Withdraw', click 'Deposit'.
This will give you a BTCT deposit address - Copy it.

Then, go to [Crypos.io](https://crypos.io), click on 'My wallets'.
Press the little green '+'. There it asks you to select a wallet,
select BTCT. After selecting this, paste the wallet address you just copied
from Altily where it says 'Enter address' and click 'Add'.

Done!

Welcome to the community of BTCT supporters and earners.
Within 3-4 hours you will start seeing your income get generated and
grow; all BTCT generated in Crypos.io will now get sent to your
Altily wallet. **Free Money!** Also, with having your BTCT in
the shared node, you are supporting and growing the BTCT network.

Thanks for your time and attention,

Thank you, enjoy earning BTCT!

Tips & Tricks, for pleasure and safety:

- * Always use 2FA (Google authenticator) on your accounts, for safety.
- * Always doublecheck the address when sending any BTCT/Cryptocurrency. If you send it to a wrong address, your funds are lost.
- * Don't invest any amount of money you can not miss. Consider it lost already, that will avoid any dissapointment and bitterness. Keep it happy and trade safe!
